Saving Money—1

Morgan is saving money to buy a new CD. On Sunday, she has \$4 in her bank. Morgan is going to feed and walk the neighbor's dog each day from Monday through Friday while they are away on vacation. She will earn \$2 each day for taking care of the dog. The neighbors will pay her when they get home on Friday night.

- How much money will Morgan have after the neighbors pay her on Friday night?
- The new CD is on sale for \$12.99 at Target this week. Will Morgan have enough money to buy the CD on Saturday morning? Explain your answer.
