

Name: _____ Date: _____

Good Weather

It's Spring and the weatherman predicts a warming trend of sunny days. Mrs. Foster's fourth graders decide to track the temperatures each day. The noon temperature on Monday is 62°F . On Tuesday, the noon temperature is 3 degrees warmer. On Wednesday, the temperature is down 2 degrees from the day before. On Thursday, the noon temperature is up 8 degrees from the previous day. On Friday, the temperature is 1 degree below the previous day.

- Complete the temperature chart below.
- Is Friday's temperature warmer than Monday's? Explain.
- Is the weatherman correct in predicting a warming trend? Explain why or why not.

Day	Change	Noon Temperature
